

SSN COLLEGE OF ENGINEERING, KALAVAKKAM
DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING
TUTORIAL – 8 Sed command and scripts

Task 1

Write sed command to include duplicate lines between the contents of the file.

Task2

Generate the sequence of numbers from 1 to 100. Write the sed command to reverse these numbers

Task 3

Create a file named email.txt with the following contents. In this file long lines are split and marked with a *soft line break* consisting of a single '=' character at the end of the line. Write sed command to join the lines by removing the soft line breaks

Contents of message.txt

All the wor=
ld's a stag=
e,
And all the=
men and wo=
men merely =
players:
They have t=
heir exits =
and their e=
ntrances;
And one man=
in his tim=
e plays man=
y parts.

Note: Refer to the class notes, understand the code and execute it
